└─────────────────────────┘

On/Off Line Switch - used to put the printer on line and off line.

Park/Load Switch   - used to perform three printer functions, Adjusting
                      Top of Form, Perforation Tear Off, and Paper Parking.

   Faxback Document # 4227 will provide specific details on Adjusting the
   Top of Form.
   Faxback Document # 4226 will provide specific details on Perforation
   Tear Off.
   Faxback Document # 4229 will provide specific details on Paper Parking.

LF/FF   - used to advance the paper one line at a time. Pressing
                     and holding the LF/FF button will perform a form feed.

Quiet/Save   - used to place the printer in quite mode. Printing
                     speed decreases because the printer prints one line in
                     two passes.
