

# GRAND VIDEO CONSOLE PLUS

(Video to VGA Converter for High Resolution Video Picture)

## 1. Introduction

The Grand Video Console Plus is a Video to VGA converter that allows you connect your video source devices such as DVD player, video camera or video game to your VGA monitor with outputs up to 1280 x 1024.

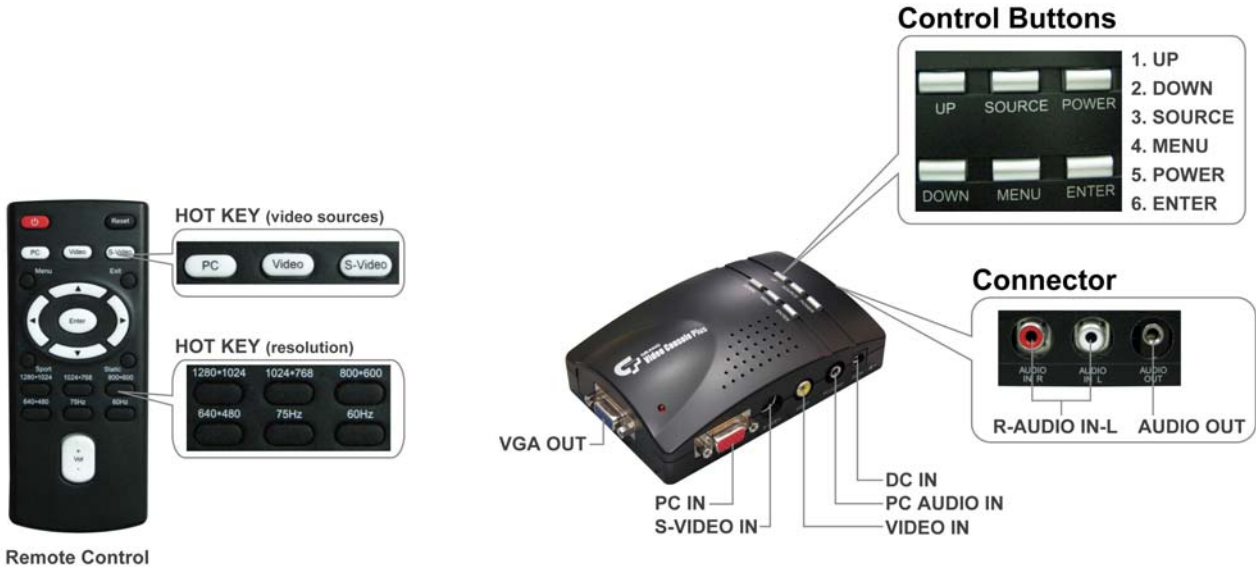

The Grand Video Console Plus supports both composite and s-video inputs. It is easy to connect your video source without any software installation, and instantly switch the source between PC, composite and S-Video using the remote control or panel buttons.

Optional Video to BNC connector, Grand Video Console Plus can be connected to CCD Cameras for security market.
